Importance of ICT in Teaching - Learning Process.

Information Communication Technology (ICT) tools Contribute to high quality lessons since they have potential to increase student's motivation connect students to many information sources, support active in- class and out- class leaning environments, and let instructors to allocated more time for facilitation. Therefore, use of ICT tools in teaching and learning process becomes a great area of research for many educators. These technologies increase student' motivation, self- confidence and self- esteem to learn. Additionally, new technologies usually encourage independent and active learning, as a result, the student feel more responsible for their own leaning. Considerable number of research on the contribution of ICT in modernizing leaning and teaching, triggers attempts to incorporate these technologies in order to benefit in terms of quality of education, flexibility, access, and its cost.

Use of Information and Technology Tools in Teaching

Different methods are used in every college to make the teaching process very attractive and effective. These teaching methods change with time. There is a notable difference between modern and ancient teaching methods. The only purpose behind using and changing teaching methods is to teach students, must be attractive and effective. Some methods Such as panel writing, reading and writing have been use for teaching since ancient times. But in modern times, this method of teaching has seen the use of information and technology tools. Today, the use of information and technology tools is must. The aim to attract students by use of information and technology tools in teaching. At the same time, it is important to bring student into changing education stream. Therefore, at present various information and technology tools are being used in every faculty of education. Also, the control system in the field of education and the system of governance has also emphasized on the use of information and technology tools.

The Department of Sociology at our college has been using various information and technology tools of modern nature for teaching. The college has provided modern facilities like computer, LCD projector, printer, internet service, network resource centre etc. Sociology curriculum and some aspects of it are taught through power point presentations. Also videos related to the syllabus and other supplementary activities are presented. In addition, these modern tools are used for event, seminars, research papers etc. related to department. The modern information and technology tools are available in college are useful to the students. The department of Sociology is trying to full use of those modern tools in each session.

In the session 2022-23, Department of Sociology has used information and technology tools in teaching. Its list and photographs are attached.

Subject : Home Economics

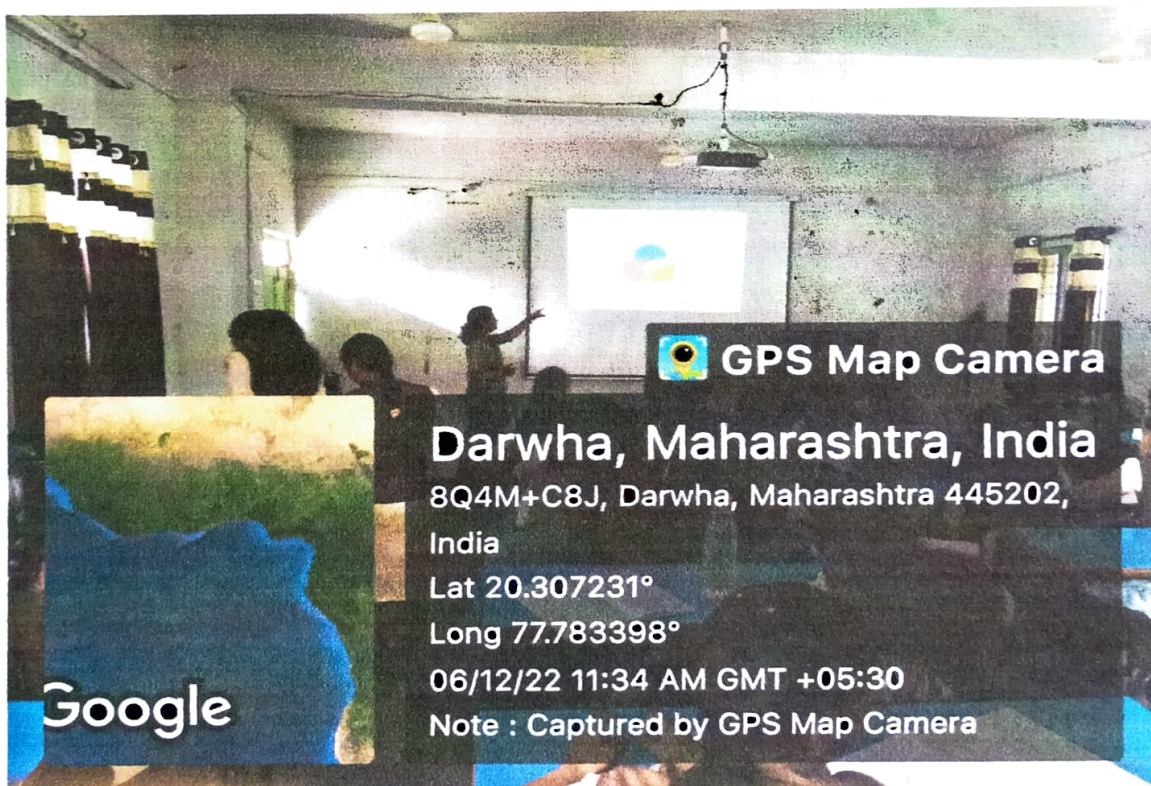

Session: 2022-23

Use of information and technology tools in teaching

Different methods are used in every college to make the teaching process very attractive and effective. These teaching methods change over time. You can see a big difference between the ancient teaching methods and today's teaching methods. The only purpose behind using and changing the teaching methods is to teach students, must be attractive and effective. Some methods such as panel writing, storytelling, reading and writing have been used for teaching since ancient times. But in modern times, this method of teaching has seen the use of information and technology tools. Today, the use of information and technology tools is a must. The aim is to attract students by using these information and technology tools in teaching. At the same time, it is important to bring students into the changing educational stream. Therefore, at present, various information and technology tools are being used in every branch of education. Also, the control system in the field of education and the system of governance has also emphasized on the use of information and technology tools.

The Department of Home Economics at our Jijamata Arts College has been using various information and technology tools of modern mature for teaching since about 2018. The college has provided modern facilities like computer, LCD projector, printer, internet service, network resource centre to the Home Economics department along with other departments. Since 2018 the department of Home Economics has been using all these information and technology tools. Home Economics curriculum and some parts of it are taught through power point presentations. Also videos related to the syllabus and other supplementary activities are presented. In addition, these modern tools are used for event, seminars, research papers, etc. related to the department. The modern information and technology tools available in the college are useful to the students. But at the same time, teachers also seem to benefit. Due to the use of those modern tools, students and teachers as well as different

Department are becoming modern. The Department of Home Economics is trying to make full use of the modern information and technology tools available in the college in each session. The use of information and technology tools has made the modern teaching process more effective than the earlier teaching process
